

IC Layout Engineer

Opportunity Type: Graduate Vacancy

Occupational Areas: Engineering

Salary Range: competitive

Opportunity Summary:

IC Mask Design, an indigenous Irish technology company, specializing in the Physical Design of Integrated Circuits is looking to recruit graduate engineers for fulltime positions in the Engineering Team based in Maynooth, Co. Kildare with an immediate start.

The potential graduate (B.Eng or N.Dip) will ideally have had some exposure to Integrated Circuit Layout and/or Integrated Design through their university/college curricula although not essential.

Excellent computer skills are essential with an aptitude to learn new software packages in a compressed timescale.

The candidate must be able to work effectively in a team environment so clear, honest and open communication skills are required.

Founded in 2002, IC Mask Design has provided electronic design services, training and software to over 130 customers in the semiconductor industry spanning 22 countries across the globe. This is a design role, where the candidate will work and train alongside IC Mask Design's experienced engineering team on real world projects in a fast paced environment.

Interested candidates can email their CV to fbrosnan@icmaskdesign.com

Location(s): County Kildare

Countries: Ireland

How To Apply:

email CV with cover letter to fbrosnan@icmaskdesign.com
